REMARKS

The substitute specification is considered to obviate the objections and rejections in the Office Action. The claims presented are in the conventional format, and are directed to the subject matter indicated to be allowable in the Office Action, all requiring an air tube positioned over an extraction basket. Accordingly, the prompt issuance of a Notice of Allowance for all of new Claims 7-11 is in order, and such action is earnestly solicited. If, for reasons not understood by the applicant, any issues remain outstanding, the Examiner is urged to contact the undersigned attorney by telephone to expedite their resolution.

Respectfully submitted,

Donald W. Huntley
